Tárgy: Értesítés újdonságkutatás elvégzéséről (A3)

É R T E S Í T É S

Bejelentők:

Georgiades Biotech Limited, Road Town/Tortola, British Virgin Islands (GB)

Ludwick Hirszföld Institute of Immunology and Experimental Therapy Polish Academy of Sciences, Wrocław (PL)

Képviselő:

Kovári György, ADVOPATENT Szabadalmi Iroda

A találmány címe:

Colostrinin és alkalmazása

A bejelentés napja: 1997. október 3.

A közzététel napja: 2000. június 28.

A Magyar Szabadalmi Hivatal az 1995. évi XXXIII. törvény (Szt.) 69.§-ának (4) bekezdése alapján az újdonságkutatás elvégzéséről hatósági tájékoztatást közöl a Szabadalmi Közlöny és Védjegytérítő 2000. évi 7. számában,

2000. július 28. napján.

Egyben a Hivatal az Szt. 69.§-ának (3) bekezdése alapján az újdonságkutatási jelentést a hivatkozott iratok másolataival együtt megküldi a bejelentőnek.

A Hivatal egyúttal tájékoztatja a bejelentőt, hogy az érdemi vizsgálatot - ha korábban nem kérték - legkésőbb az újdonságkutatás elvégzéséről közölt hatósági tájékoztatás fent megjelölt napjától számítot hat hónap elteltéig lehet kérni.

Az érdemi vizsgálatra irányuló kérelem elmaradása esetén úgy kell tekinteni, hogy a bejelentő lemondott az ideiglenes szabadalmi oltalomról.

Kivonat:

A találmány tárgya eljárás immunglobulin hatóanyag előállítására nem-immunizált szarvasmarhák előtejből (colostrum). A hatóanyag immunglobulin-tartalma magas, ugyanakkor antikomplementer-aktivitása alacsony. Embernek orálisan, állatoknak intravénásan is adható önmagában vagy gyógyszerkészítmény alakjában baktériumok- vagy toxinok-okozta betegségek, különösen az AIDS-betegek vagy más immunhiányban szenvedők súlyos hasmenése, az "utazók hasmenése", a csecsemők toxin-okozta hasmenése, gyomor- és nyombélfekélyek, krónikus és akut Yersinia-fertőzések vagy protozoonok okozta megbetegedések kezelésére.

Igéypont:

1. Eljárás immunglobulin hatóanyag előállítására szarvasmarhák ellés utáni 30, előnyösen 10 órán belül kifejt előtejből (a colostrumból), az előtej desztillált vízzel történő hígításával, a hígított előtej pasztörözésével, a tejszír eltávolításával és a kazein kicsapásával és eltávolításával, azzal jellemezve, hogy az így kapott előtejsavót 145-180 °C bemeneti, és 65-70 °C kimeneti hőmérséklet mellett porlasztva szárítjuk. (Elsőbbsége: 1988. 04. 19.)
2. Az 1. igéypont szerinti eljárás, azzal jellemezve, hogy az előtejsavót a porlasztva szárítás előtt töményítjük. (Elsőbbsége: 1988. 04. 19.)
3. Az 1. vagy a 2. igéypont szerinti eljárás, azzal jellemezve, hogy az előtejsavót a porlasztva szárítás előtt oktánsavval kezeljük. (Elsőbbsége: 1988. 04. 19.)
4. Eljárás bakteriális, protozoa eredetű vagy toxinok okozta megbetegedések, gyomor- és bélbetegségek vagy immunhiányos állapotok kezelésére alkalmas gyógyászati készítmény előállítására, azzal jellemezve, hogy az 1-3. igéypontok bármelyike szerint előállított hatóanyagot önmagában vagy a szokásos gyógyszerkészítési segédanyagokkal összekeverve ismert módon formázzuk. (Elsőbbsége: 1988. 11. 02.)

Abstract

The subject of the invention relates to the production of immunoglobulin active agent from the foremilk (colostrum) of cattle. The immunoglobulin content of the active ingredient is high, but at the same time its anti-complementary activation is low. It may be administered orally for humans and intravenously for animals on its own or in the form of a pharmaceutical preparation for the treatment of bacteria or toxin-caused illnesses, serious diarrhoea of AIDS patients or of patients suffering from other immune deficiency diseases, "traveller's diarrhoea", toxin-caused diarrhoea in infants, stomach and duodenal ulcers, chronic and acute Yersinia infections or illnesses caused by protozoa.

Claims:

1. Procedure for the production of immunoglobulin active agent from the foremilk (colostrum) of cattle taken within 30 hours, favourably 10 hours, of giving birth by the dilution of the foremilk in distilled water, pasteurising the diluted foremilk, the removal of the milk fat, and the precipitation and removal of the casein characterised by that the lactic acid obtained from the foremilk is spray dried with an input temperature of 145-180 °C and an output temperature of 65-70 °C. (Priority: 19/04/1988)
2. The procedure according to claim 1 characterised by that the foremilk lactic acid is concentrated before spray drying. (Priority: 19/04/1988)
3. The procedure according to claims 1 or 2 characterised by that the foremilk lactic acid is treated with caprylic acid before spray drying. (Priority: 19/04/1988)
4. Procedure for the production of a medial preparation suitable for the treatment of bacteria, protozoa or toxin caused illnesses, stomach and intestine illnesses or immune deficiency conditions characterised by that any of the active agents produced according to any of the claims 1-3 is formed mixed with the usual pharmaceutical preparation auxiliary materials or on its own. (Priority: 02/11/1988)

International application No. PCT/GB97/02721	International filing date (day/month/year) 03/10/1997	Priority date (day/month/year) 03/10/1996	
International Patent Classification (IPC) or national classification and IPC C07K14/27			
Applicant LUDWICK HIRSZFELD INSTITUTE OF et al.			

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.

2. This REPORT consists of a total of 6 sheets, including this cover sheet.

- ☐ This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).

These annexes consist of a total of sheets.

3. This report contains indications relating to the following items:

- I ☒ Basis of the report
- II ☐ Priority
- III ☐ Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- IV ☐ Lack of unity of invention
- V ☒ Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- VI ☐ Certain documents cited
- VII ☐ Certain defects in the international application
- VIII ☒ Certain observations on the international application

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/GB97/02721

I. Basis of the report

1. This report has been drawn on the basis of (*substitute sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to the report since they do not contain amendments.*):

Description, pages:

1-21 as originally filed

Claims, No.:

1-55 as originally filed

Drawings, sheets:

1/1 as originally filed

2. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
☐ the claims, Nos.:
☐ the drawings, sheets:

3. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

4. Additional observations, if necessary:

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/GB97/02721

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Yes:	Claims	2-7,9-17,19-22,25-30,32,34-41,43,46,47,51-55
	No:	Claims	1,8,18,23,24,31,33,42,44,45,48,49,50
Inventive step (IS)	Yes:	Claims	3-7,10,11,13-17,20,21,25,27-30,36-41,46,47,53
	No:	Claims	1,2,8,9,12,18,19,22-24,26,31-35,42-45,48-52,54,55
Industrial applicability (IA)	Yes:	Claims	1-55
	No:	Claims	

2. Citations and explanations

see separate sheet

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

see separate sheet

Ad section V.:

1. The following documents are cited:

D1 Archivum Immunologiae et Therapiae Experimentalis 39(5-6), 461-467, 1991
D2 The Biochemical Journal 199(1), 9-15, 1981
D3 Archivum Immunologiae et Therapiae Experimentalis 41(5-6), 275-279, 1993

2. The present International application refers to the use of colostrin as a medicament, particularly in the treatment of chronic disorders of the central nervous system and the immune system, to a method of preparing colostrin from mammalian colostrum, to the C-terminal nonapeptide of colostrin and its use in the manufacture of a medicament.

In view of the documents cited in the International Search Report only the subject-matter of claims 2-7,9-17,19-22,25-30,32,34-41,43,46,47 and 51-55 of the present International application has to be regarded as being new (Article 33(2) PCT).

- 2.1 D1 describes the effect of a proline-rich polypeptide (PRP), isolated from ovine colostrum, on the development of autoimmune anaemia and survival of New Zealand Black (NZB) mice. It could be shown that PRP significantly reduces the percentage of mice exhibiting positive Coombs reaction and prolonged life of these mice. PRP, given at a very broad range of doses, was efficient in lowering the incidence of haemolytic anaemia in NZB mice. The results shown in D1 indicated that PRP affected condition of NZB mice by restoring suppressor T cell function and thus, PRP have therapeutical value and can be used in the treatment of autoimmune disorders (see D1, p.461-462, 'Abstract' and 'Introduction', p.464-466, 'Discussion').

Therefore, in view of the disclosure of D1 the subject-matter of claims 1,8,18,23,24,31,33,42,44,45 and 50 is not new.

- 2.2 D2 discloses the chemical and physical characterization of PRP from ovine colostrum. A detailed purification process for PRP is outlined in the document (see D2, p.1981,'Isolation of proline-rich polypeptide').
Thus, claims 48 and 49 lack novelty.

3. The closest prior art to evaluate the inventiveness of claims 2-7,9-17,19-22,25-

30,32,34-41,43,46,47 and 51-55 of the present International application is also the above cited document D1.

- 3.1 Claims 2,9,19 and 43 concern the use of colostrinin as a medicament for humans and claims 34 and 35 refer to a pharmaceutical composition comprising colostrinin in different application forms.

As outlined above ovine colostrinin has been used in the treatment of chronic disorders of the immune system of mice.

For a person skilled in the art it is a straight forward procedure to go on and to develop a medicament for humans based on the results from mice. It is merely a common procedure that a compound first will be tested in animal experiments before it will be applied to humans in clinical studies. As well it is common knowledge that a pharmaceutical composition can be prepared in different forms depending on its intended application such as in a form suitable for absorption or as a tablet, gel or plaster etc..

Claims 12,22,26 and 32 refer to colostrinin derived from a non-ovine source, and claims 51,52,54 and 55 refer to a nanopeptide of colostrinin for use as a medicament or being comprised in a pharmaceutical composition.

D3 describes an active nonapeptide fragment isolated from the products of PRP digestion or obtained by chemical synthesis. Said nonapeptide shows full spectrum of biological activities of PRP and it is assumed that this nonapeptide may have a therapeutic value, especially in cases of autoimmune disorders.

Moreover, D3 discloses that PRPs have been found in other sources, such as dog colostrum, human and bovine milk, parotid-gland saliva (see D3, p.275,'Abstract', p.277-279, 'The Relationship between the Structure of PRP and its activity').

For a person skilled in the art it is merely a common procedure to combine the teachings of D1 and D3, and thus to use the nonapeptide instead of the PRP as a medicament or in a pharmaceutical composition.

Therefore, claims 2,9,12,19,22,26,32,34,35,43,51,52,54 and 55 are considered to lack an inventive step.

- 3.2 However, in the prior art no indication has been given that colostrinin can be used in the treatment of chronic disorders of the central nervous system, in the

treatment of diseases with a bacterial and viral aetiology or in the treatment of acquired immunological deficiencies. Moreover, in the prior art no indication has been given for the use of colostrinin as a dietary supplement or for use as a prophylactic medicament for humans to prevent or inhibit the development of Alzheimer's disease.

Therefore, an inventive step has to be acknowledged for claims 3-7,10,11,13-17,20,21,25,27-30,36-41,46,47 and 53 of the present International application (Article 33(3) PCT).

Ad section VIII.:

1. Claim 45 lacks clarity due to the expression "prophylactic medicament". A drug can be used as a medicament in general or the drug can be used as a prophylactic medicament for a certain diseases, but not prophylactical in general.
2. The applicant is asked to check the references of claims 10 and 11. Furthermore, the applicant is asked to check the numbering of the claims, because there are two claims being numbered "44".
3. The present International application contains an unacceptable number of independent claims. Therefore, the requirements of Article 6 PCT regarding conciseness of claims has not been met. In this context, the attention of the applicant is drawn to the fact that undue repetition of wording between one claim and another should be avoided by use of the dependent form.
4. With respect to claims 23-30 you are already informed that in case of an European application said claims are not allowable because, "methods of treatment of the human or animal body by surgery or therapy and diagnostic methods practised on the human or animal body shall not be regarded as inventions which are susceptible of industrial application."

PCT

INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference PAC/18434	FOR FURTHER ACTION see Notification of Transmittal of International Search Report (Form PCT/ISA/220) as well as, where applicable, item 5 below.	
International application No. PCT/GB 97/02721	International filing date (day/month/year) 03/10/1997	(Earliest) Priority Date (day/month/year) 03/10/1996
Applicant LUDWICK HIRSZFELD INSTITUTE OF et al.		

This International Search Report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This International Search Report consists of a total of 4 sheets.

☒ It is also accompanied by a copy of each prior art document cited in this report.

- ☒ Certain claims were found unsearchable (see Box I).
- ☐ Unity of invention is lacking (see Box II).
- ☐ The international application contains disclosure of a nucleotide and/or amino acid sequence listing and the international search was carried out on the basis of the sequence listing
 - ☐ filed with the international application.
 - ☐ furnished by the applicant separately from the international application,
 - ☐ but not accompanied by a statement to the effect that it did not include matter going beyond the disclosure in the international application as filed.
 - ☐ Transcribed by this Authority
- With regard to the title, ☒ the text is approved as submitted by the applicant.
☐ the text has been established by this Authority to read as follows:
- With regard to the abstract, ☒ the text is approved as submitted by the applicant.
☐ the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. The applicant may, within one month from the date of mailing of this International Search Report, submit comments to this Authority.
- The figure of the drawings to be published with the abstract is:
 - Figure No. _____ ☐ as suggested by the applicant.
 - ☐ because the applicant failed to suggest a figure.
 - ☐ because this figure better characterizes the invention.

☒ None of the figures.

INTERNATIONAL SEARCH REPORT

International application No.

PCT/GB 97/02721

Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☒ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:
Remark: Although claim(s) 23-30, 42 and 43
are directed to a method of treatment of the human/animal
body, the search has been carried out and based on the alleged
effects of the compound/composition.
2. ☐ Claims Nos.:
because they relate to parts of the International Application that do not comply with the prescribed requirements to such
an extent that no meaningful International Search can be carried out, specifically:
3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

1. ☐ As all required additional search fees were timely paid by the applicant, this International Search Report covers all
searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment
of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report
covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is
restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
☐ No protest accompanied the payment of additional search fees.
